

Sir Paul Boffa Hospital

Structure, Functions and Responsibilities

2020 was a year of transition for this hospital. This was due to the change in service provision, from one oriented towards Dermatology and geriatric long stay care, to one related to COVID19 services.

This transition meant that we had to relocate our 52 elderly residents to other long-term facilities, the dermatology ward patients were all transferred to MDH. The outpatient department was temporarily transferred to a site at Gzira. This site was later emptied, and dermatology ward services were later on transferred to MDH.

In addition to the services that we are offering to the COVID19 patients, we have managed to set-up and administering Rapid Anti-gen tests (averaging to 180 daily swabs). We have also opened and converted the PUVA clinic into a vaccination HUB, administering an average of 190 vaccines since the very beginning.

Contact Details of the FOI Office of Sir Paul Boffa Hospital

Address: 15, Palazzo Castellania, Merchants' Street, Valletta VLT 1711
